The Genes for Opening-up

2000
Years ago

Fuxu Port (present-day Huangpu Port) is a departure port of the ancient Maritime Silk Road established in the Sui and Tang dynasties connecting China with the world. It is the only foreign trade port that has never once been closed since ancient times.

1400
Years ago

Out of the four largest and most complete sea god temples in China, Nanhai God Temple is the only one that still exists in the present day. This historical site plays an important role in and acts as a witness to the history of foreign trade.

1924

Whampoa Military Academy, a school founded by Dr. Sun Yat-sen, is hailed as the "Cradle for Army Commanders" in China's modern history. Many talents who made great contributions to China's democratic revolution came from this place.

1984

Guangzhou Development District was established at the beginning of Guangzhou's reform and opening-up. It started merely with funds of RMB 20,000 and a land area of 9.6 km².

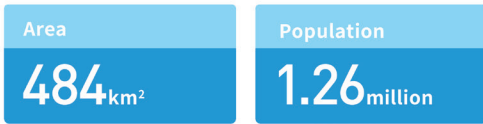

2015

Guangzhou Development District and Huangpu District were merged, collectively known as Huangpu District / Guangzhou Development District. The newly formed district shares office with Guangzhou High-tech Industrial Development Zone, Guangzhou Export Processing Zone, Guangzhou Bonded Zone, and China-Singapore Guangzhou Knowledge City under a unified administrative system. More preferential policies offer more business opportunities here.

Exceptional Geographical Location

Situated in the east of Guangzhou and in the center of the Guangdong-Hong Kong-Macao Greater Bay Area (GBA), Huangpu District / Guangzhou Development District (hereinafter GDD or the "District") serves as the strategic pivot for the urban development of eastern Guangzhou. Known as the "Pearl of the GBA", GDD plays an essential role in China's Belt and Road Initiative.

Reaching Guangzhou Baiyun International Airport in 30 mins, and other major GBA cities, e.g., Hong Kong and Macao, in one hour.

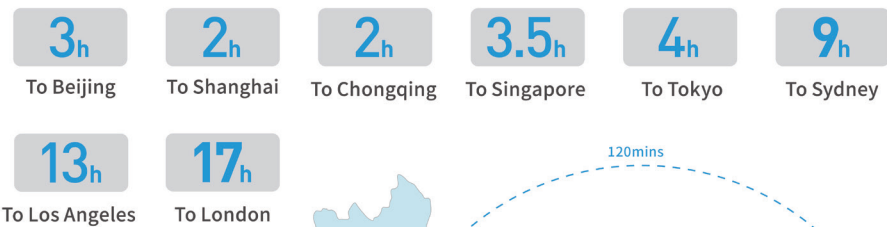

With eight 30,000-ton berths, Huangpu Port is among the largest container terminals in South China.

Guangzhou is one of China's three communication hubs, Internet exchange centers and international Internet entry/exit points. Its Huangpu District is also the country's first 5G tech-oriented IoT and smart city demonstration zone.

Seven metro lines run through the District, and an intercity railway connects Guangzhou with major neighboring cities of Dongguan and Shenzhen, providing convenience to work and life.

Strong Economic Strengths

As of December 2022

Fixed asset investments

USD **28** Billion

Value of industrial output by enterprises above designated scale

USD **130** Billion

Government fiscal revenue

USD **17** Billion

Regional GDP

USD **63** Billion

Established economic and trade ties with

Over **200** countries and regions

Multinational companies

Over **4,600**

Projects invested by Fortune Global 500 companies

Over **300**

Listed Chinese companies

Around **80**

GDD ranked first among China's development zones for years in key economic indexes, e.g., realized FDI.

The District became the winner of the UN Investment Promotion Award in 2019 and has received the Award of National Investment Promotion Agencies for consecutive years.

Outstanding Innovation Capacity

6.14%

Invested 6.14% GDP in R&D
the highest within Guangzhou

5,000,000 m²

Housing the largest cluster of incubators in South China,
covering an area of over 5 million m²

Ranked first among China's development zones in
tech innovation for four consecutive years

20,000+

Over 20,000
tech-based companies

2,500+

More than 2,500
high-tech enterprises

2/3

Home to 2/3 of listed high-tech
firms in Guangzhou

24,000

Over 24,000
patent applications

Large Talent Pool

Guangdong's 80% universities and 70% R&D agencies are located in Guangzhou, with over 500,000 graduates each year, providing a sufficient talent reserve for Huangpu.

The District has teams led by Nobel Prize Winners, and professional teams led by academicians Zhong Nanshan, Wang Xiaodong, Shi Yigong, etc. So far, over 100 academicians and 1,000 high-caliber talents have joined the District, making it a highly attractive destination for talents in China.

Solid Industrial Foundation

GDD focuses on vigorously developing strategic emerging industries to build the "Three Cities & One Island", i.e. Knowledge City, Science City, Maritime Silk Road City, and Bio Island.

GDD acts as the main ground for Guangzhou's real economy, the key driver of its sci-tech innovations, as well as the frontier of reform and opening-up. The District has established five 100-billion-worth (RMB) industrial clusters in automobile manufacturing, new display, green energy, new materials, cosmetics & healthcare as well as three 10-billion-worth (RMB) industrial clusters in biotech, high-end equipment and integrated circuit.

During the 14th Five-Year Plan period, the District will concentrate on implementing its "Four Trillion Plans" to achieve an RMB 1 trillion-scale respectively in industrial output, state-owned capital, commodity sales, and fixed asset investment, and build two world-class emerging industry clusters of next-generation information tech and biotech. Besides, it will create four strategic emerging industry clusters of integrated circuits, new materials, green energy, and high-end equipment, while strengthening the two advanced manufacturing industry clusters of automobile and cosmetics & healthcare. The District will also bring in future-oriented industries, e.g., brain-inspired intelligence, future network, deep-sea and aerospace exploration, hydrogen energy, and energy storage in a forward-looking way.

Favorable Business Environment

GDD has ranked first among China's development zones in ease of doing business

Huangpu has ranked first among China's economic development zones in its ease of doing business for consecutive years. The District has established the first bureau dedicated to business environment reforms among China's first-tier cities of Beijing, Shanghai, Guangzhou and Shenzhen, with many reform practices being reduplicated across the city and province and even the whole country.

Administrative approval speeds up to enhance business efficiency

Actions have been taken to accelerate administrative approval and enhance business efficiency and build a system of immediate response to enterprises' requests for services and a service mechanism for efficient enterprise establishment to enable "construction projects to begin upon obtaining the lands". It takes less than 18 months for CanSemi to go from factory piling to mass production. TCL CSOT completed the construction project for display panels ranging from piling to the completion of the main building in merely nine months, the fastest among display panel projects in the industry.

District with the Most Satisfied Entrepreneurs

Huangpu is the district most favorable to enterprises, as it has been the first in China to set up windows for receipt of policy support. Policy support can be gained through one visit within a limited time frame. It only takes 10.5 working days normally and half a day at the fastest speed.

The only comprehensive reform pilot zone for IPR application and protection in China

As the only comprehensive reform pilot zone for IPR application and protection in China, the District is home to over 200 IPR-related agencies, e.g., Guangzhou Intellectual Property Court, Guangzhou IP Exchange, Patent Examination Cooperation Guangdong Center of the Patent Office, CNIPA, and WIPO Technology and Innovation Support Center. Now it has a robust IPR protection system covering justice, mediation, arbitration, administrative law enforcement and speedy rights protection, and a diverse resolution mechanism for IPR disputes.

Unparalleled Ecological Environment

The District, builds itself into "a city lying in forests with adjoining mountains and waters", displaying Lingnan cityscape characteristics. Because of this, GDD won France's Novum Design Award (NDA) and the national three-star certificate for green and ecological urban area design, etc., becoming a benchmark for new city construction in Guangdong and even the country.

With 20 reservoirs and 50 parks under its administration, the District has planned over 50 kilometers of greenways in an effort to create a city park.

Lake trails and hiking trails have been set up in Maofeng Mountain Forest Park and Youma Mountain Ecological Park. The hiking facilities have also been continuously improved to build itself into an ecological tourism destination in eastern Guangzhou.

Boutique villages, e.g., Jingxia and Mai Villages, make full use of their mountain and river resources, as well as their picturesque idyllic landscape and rise to be top-rated tourism spots in the region.

Profound Historical Background

Nanhai God Temple ▲

Out of the four largest and most complete sea god temples in China, Nanhai God Temple is the only one that still exists in the present day. With a history of over 1,400 years, this Temple served as the venue for emperors to worship the sea. The view of Nanhai Temple ranks first as "Fuxu Baths in the Sun" among the eight sights of Guangzhou as early as the Song and Yuan dynasties.

Boluodan Temple Fair ▲

Boluodan Temple Fair, also known as the Nanhai God Temple Fair, has been held since the Song Dynasty. It is a local temple fair in memory of the God Zhurong and to celebrate his birthday. As the only folk custom worshipping a sea god in China, Boluodan Temple Fair was selected among the third batch of Chinese intangible cultural heritage in 2011.

Liantang Ancient Village ▲

Liantang Village is a traditional village in China and a famous historic and cultural village in Guangdong. Conserved in the village are the 12 wells first built in the Song Dynasty, the Memorial Hall of Chen Shisi built in the Qing Dynasty, and other ancient buildings with Lingnan characteristics, e.g., the Hongyou Family School, Xiuchang Studio, and Yougong Study.

Yuyan Academy ▲

Established in the Southern Song Dynasty, Yuyan Academy has a history of over 800 years. It is one of the 12 prestigious academies throughout Guangzhou's history and also the earliest one to still exist in the present day.

Sound Supporting Facilities

Healthcare

The District is home to nearly 10 quality 3A-grade hospitals, e.g., Sun Yat-sen University Cancer Center, Lingnan Hospital of the Third Affiliated Hospital of Sun Yat-sen University, the Affiliated Women and Children's Hospital of Guangzhou Medical University, the Fifth Affiliated Hospital of Guangzhou Medical University, Guangdong Provincial People's Hospital (Huangpu) and Knowledge City Southern Hospital. There are around seven hospital beds per 1,000 permanent residents, which is leading the entire country.

Education

The District has a high concentration of international schools, e.g., the American International School of Guangzhou, Japanese School of Guangzhou, Guangzhou SCA School, ISA International School of Guangzhou, and Huangpu Shrewsbury Experimental School, as well as locally renowned middle and high schools including the High School Affiliated to Beijing Normal University, Guangdong Experimental High School, and Guangzhou No.2 Middle School, etc. Besides, the District is also home to many research institutes, e.g., Guangzhou Institute of Technology of Xidian University, Huangpu Research Institute of Guangzhou University, Huangpu Research Institute of Guangdong University of Foreign Studies, Huangpu Institute for Advanced Study, University of Chinese Academy of Social Sciences, and China-Singapore International Joint Research Institute, with over 5,000 postgraduate students here.

Accommodations

Numerous five-star hotels can be found, e.g., the Knowledge City Mordin Hotel, Narada Hotel Huangpu. The District also provide diverse housing for talents.

Recreation

The District houses commercial complexes, e.g., Greenland Central Plaza, Wanda, Aoyuan, Minjie and Ruifeng Plaza; a complete range of cultural and sports facilities like Guangzhou Baoneng Qoros Arena, International Tennis Center, Badminton Center, and libraries.

Enterprise Feedback

Wang Xiaodong

Co-founder of BeiGene, Member of the American Academy of Sciences and International Fellow of the Chinese Academy of Sciences, and Director of National Institute of Biological Sciences, Beijing

For us, BeiGene's establishment of a base in GDD was an "All IN" matter – We put everything we've got into it. We made this decision for three reasons. First, there is mutual trust between the government and enterprises in Guangzhou, and the municipal government provides excellent services. This is the key. Second, Guangdong is China's economic powerhouse, and it is close to Southeast Asia. If we produce products in our Guangzhou Base and then export them to Southeast Asia and countries along the "Belt and Road", it is much easier for them to sell since our products will be much more competitive. Third, Guangzhou is an extremely open city, which is attractive to bio-entrepreneurs like us who truly value free minds.

Peng Wei

President of Carl Zeiss Vision (China)

As a world-leading high-tech firm in the optical & optoelectronic industry, Carl Zeiss Vision has set up six corporate entities in GDD, forming a sound and sustainable industrial ecosystem for our vision care business, thanks to the support of the local government.

"People often say, 'don't put all your eggs in one basket'. Well, after thorough discussions, we decided to put all our six 'eggs' in this one 'basket'." For Zeiss Group, GDD is our "safe box".

Yao Weibing

President & Chairman of Guangzhou MINO Equipment Co., Ltd.

We set up our headquarters in GDD in 2013. In the past decade, thanks to the favorable business environment and industrial policies here, we've managed to achieve fast and healthy growth. Through digital transformation and global expansion, MINO has grown into a world-leading smart manufacturer of automobile equipment. On October 24, 2018, General Secretary Xi Jinping paid a visit to our company. Looking ahead, we will continue to make independent innovations and dedicate ourselves to smart manufacturing for sustainable and leapfrog development on the fertile soil of GDD.

He Jinglin

Chairman of Macao Juvenile Venture International Group Ltd. as well as Macao Deputy to the National People's Congress and President of the Industry and Commerce Association of Macao

As a trailblazer in business environment reform, GDD has promulgated the special policies of Ten Measures for Hong Kong and Macao Youth (Innovation and Entrepreneurship) in recent years, facilitating mutual assistance between GDD and Hong Kong and Macao in areas like scientific and technological innovation and financial investment. So far, we have invested in and built numerous innovation carriers, e.g., Guangdong & Macao Young Entrepreneurs International Industrial Accelerator, Science City Macao Youth Innovation Tribe, and Knowledge City Macao Youth Innovation Tribe. The construction of Macao Center and Guangzhou-Macao Innovation Port are also underway. Over the years, GDD has incubated nearly 300 enterprises and introduced over 100 companies from Hong Kong and Macao.

Rupert Hoogewerf

Chairman and Chief Researcher of Hurun Report

Unicorn enterprises, "gazelle" enterprises, and SRDI enterprises (i.e. specialized and sophisticated SMEs that produce novel and unique products) sprout up in the District. This results from GDD's emphasis on tech innovation and will constantly inject vitality into its future development. Huangpu is encouraging business founders to be at the forefront, push their limits and take their businesses to a higher level. This entrepreneurship and these qualities are very similar to those of Silicon Valley.

Investment Promotion Agency

GDD Investment Promotion Bureau is responsible for promoting investment, providing investors and enterprises with a full range of services from making contacts, negotiation to approval.

Policy Measures for High-quality Development of Guangzhou Development District/Huangpu District

I. Introducing Quality Investment

Project Establishment Incentive

- Newly introduced quality project is entitled to an incentive up to **RMB 10 million**.

Major Project Incentive

- An incentive up to RMB 500,000 will be granted to the referrer of a new wholesale project with annual business revenue above RMB 10 billion, financial project with revenue above RMB 2 billion, and retail and other for-profit project with revenue above RMB 1 billion. An incentive up to **RMB 500,000**, 1 million or 2 million will be given to the referrer of a new manufacturing project with a fixed-asset investment above RMB 1 billion and an annual output value of more than **RMB 3 billion, 5 billion or 10 billion**.

Industrial Chain Incentive

- To encourage investment in industrial chains, an incentive of RMB 100,000 will be granted to each enterprise or organization for introducing a project in strategic emerging sectors encouraged by the District and achieving an output value of **RMB 20 million** for the first time within the policy period.

Foreign Investment Incentive

- Each eligible foreign enterprise is entitled to an incentive less than 1.5% of its actual investment amount within the year, up to **RMB 100 million** for a single enterprise.

II. Elevating Capacity for the Manufacturing Sector

Construction/Production Incentive

- To encourage "construction upon land acquisition", a one-time incentive of RMB 200,000 will be granted to each socially invested industrial project that newly acquires construction land by "transfer with a planning scheme", and an incentive up to RMB 800,000 will be given to each investor that begins construction at the site in advance or within three months after the site has been ready for delivery and construction formalities have been handled. Moreover, each of the top three leaders of the project owner's preparatory team is entitled to an incentive of RMB 50,000.
- To encourage "production upon completion", an incentive up to RMB 800,000 will be granted to each socially invested industrial project that newly acquires construction land, completes construction before the deadline agreed in the land transfer contract, and includes its output value in the statistics of the District within three months upon completion. Moreover, each of the top three leaders of the project owner's preparatory team is entitled to an incentive of RMB 50,000.

Economic Contribution Incentive

- Each growing enterprise with an annual output value above RMB 3 billion is entitled to an incentive equal to 6% of its contribution to the District's economic development within the year, but subject to a ceiling of **RMB 10 million**.
- Enterprise with an annual output value above RMB 3 billion and a YoY growth rate of over 3%, an annual output value above RMB 1 billion and a YoY growth rate of over 5%, an annual output value above RMB 500 million and a YoY growth rate of over 8%, or an annual output value above RMB 100 million and a YoY growth rate of over 10%, is entitled to an incentive equal to 9% of its stable contribution to the District's economic development, whichever is the highest as compared with the previous two years, and 60% of the incremental portion. The incentive for the stable portion shall not exceed **RMB 20 million**.
- Each newly incorporated enterprise is entitled to an incentive equal to 100% of its contribution to the District's economic development within the year when it can achieve increments over statistical months and an output value above RMB 100 million during the validity period of these policy measures. However, if its output value grows faster than 10% in the second or the third year, the enterprise is entitled to an incentive equal to 60% of its contribution to the District's economic development within the year.

Each enterprise growing from below to above designated size for the first time is entitled to a one-time incentive of **RMB 100,000**.

Enterprise Talent Incentive

Each eligible enterprise talent is entitled to an incentive equal to 15% of his/her taxable income, which may be up to **RMB 3 million** per person per year, but shall not exceed 100% of the taxable amount.

Transformation/Upgrading Incentive

- Enterprise implementing a registered tech transformation project with a fixed-asset investment of more than RMB 5 million and spending over RMB 2 million in purchasing equipment and tools, or a registered investment and capacity increase project that spends over **RMB 20 million** in purchasing equipment and tools, is entitled to an incentive equal to **5%, 8%, 10% and 12%**, respectively, of the purchase cost if its annual output value grows at a YoY rate of less than 5%, above 5%, above 8% or above 10% in the year of completion, up to **RMB 20 million** for a single enterprise each year.
- Enterprise implementing a registered tech transformation or investment and capacity increase project with a fixed-asset investment above RMB 200 million, is entitled to an incentive in phases equal to 12% of the purchase costs of project equipment and tools, up to **RMB 30 million** for a single project.
- Each going concern enterprise that has been operating in the District continuously for 15 years is entitled to an incentive equal to 5% of its actual expenses spent on equipment updating, digitalization and industrial transformation, up to **RMB 10 million** for a single enterprise each year.

Industry Linkage Incentives

Enterprise that actively contributes to the cohesion of an industrial chain is entitled to an incentive up to RMB 2 million.

Enterprise above designated size that produces and sells products through consignment processing is entitled to an incentive equal to 1% of the incremental portion and 1‰ of the stable portion. The incentive for the stable portion may be up to **RMB 2 million**.

Multi-story Plant Incentive

Newly settled industrial enterprise in designated industrial buildings with an output value reaching RMB 15,000, 25,000 or 35,000 per square meter is entitled to an incentive equal to 10%, 20% and 30% of the rental payment, respectively, up to **RMB 500,000** for a single enterprise each year.

III. Empowering Scientific and Technological Innovations

High-tech Enterprise Incentive

Newly settled high-tech enterprise above designated size in the District is entitled to one-time incentive of **RMB 300,000**.

Enterprise Mix Cultivation

Leading enterprises in the District are welcomed to establish their internal incubation mechanism. A one-time incentive of **RMB 200,000** will be given if a high-tech enterprise has been incubated with a direct shareholding ratio of not less than 30%. High-growth enterprises are also encouraged to grow into gazelle enterprises and unicorns. Gazelle enterprises recognized for the first, second and third time will be granted with one-time incentives. Support will be provided to recognized or potential unicorns in terms of certification, R&D and innovation, key projects and work sites.

R&D Funding

Enterprise above designated size that has established an internal R&D institution, spends more than RMB 5 million in R&D and achieves a YoY growth above 5%, is entitled to an incentive equal to 1% of its R&D expenses, up to **RMB 12 million** proportionally by levels. Enterprise newly included in the statistics and expending in R&D a total amount of over RMB 5 million is entitled to an incentive equal to 1% of its R&D expenses, up to **RMB 500,000**.

A one-time incentive up to **RMB 3 million** will be given to a research institute or enterprise that has been recognized solely or jointly for the first time by Chinese ministries and commissions as state key laboratories, national engineering research centers, national engineering laboratories, industrial innovation centers, manufacturing innovation centers, and national technological innovation demonstration enterprises, etc. A one-time incentive up to **RMB 2 million** will be given to a national enterprise technology center, enterprise included in the national pilot smart manufacturing program, and enterprise in pilot industrial Internet program that have been recognized for the first time by Chinese ministries and commissions.

Upon approval, projects under international or HK-Macao sci-tech cooperation plans in which an enterprise in the District plays an important role is entitled to an incentive up to **RMB 2 million**.

Equipment Breakthrough Incentive

A one-time incentive of **RMB 500,000, 200,000 and 100,000** (up to **RMB 500,000** for a single project each year) will be given if any product developed by the enterprise has been listed in Guidance Catalog for the Promotion and Application of First Major Technological Equipment at the national, provincial (Guangdong) and municipal (Guangzhou) levels.

Technological Breakthrough Incentive

Technological projects funded by administrative authorities at the national, provincial and municipal levels will be entitled to an incentive equal to **100%, 50% and 30% of the fund they have received, up to RMB 5 million, 3 million and 1 million**, respectively.

An open competition mechanism will be introduced to select the best candidates to lead key research projects. Each successful project is entitled to an incentive equal to 30% of its total inputs, but subject to a ceiling of **RMB 10 million**.

Platform Construction Incentive

Tech enterprise incubator newly recognized at the national, provincial and municipal levels is entitled to a one-time incentive of **RMB 1 million, 500,000 and 250,000**, respectively. Each newly recognized national specialized maker space, national registered maker space or provincial maker space is entitled to a one-time incentive of **RMB 250,000, 200,000 and 100,000**, respectively. If the entity gets recognized level by level, only the difference will be made up.

Instrument Sharing Support

Key laboratories, public service platforms, analytics and testing centers, and the like set up by local universities, research institutes, enterprises or social organizations will be supported if they share their instruments and facilities to other enterprises in the District. Each year, no more than 10 demonstration institutions will be selected for a level-by-level support up to **RMB 1 million**.

Scientific and Technological Award Funding

First contributor to a project winning the Special Prize, First Prize or Second Prize of the State Scientific and Technological Progress Award is entitled to a one-time support of **RMB 1.5 million, 1 million or 500,000**, respectively.

First contributor to a project winning the Guangdong Scientific and Technological Progress Awards or the Guangdong Scientific and Technological Achievement Promotion Award is entitled to an incentive equal to 50% of the amount received at the national level, but subject to a ceiling of **RMB 500,000**.

Enterprise in the District winning the first prize, second prize or third prize of the China Innovation & Entrepreneurship Competition organized by the Ministry of Science and Technology at the national level is entitled to a one-time incentive of **RMB 300,000, 200,000 or 100,000**, respectively.

Enterprise winning the first prize, second prize or third prize of the China Innovation & Entrepreneurship Competition (Guangdong Division) as approved by the provincial science and technology authorities, is entitled to an incentive equal to **50%** of the amount received at the national level, but subject to a ceiling of **RMB 500,000**.

For a project ranking top three or a winner of the first prize, second prize or third prize of "Maker in China" organized by the Ministry of Industry and Information Technology and the China Innovation & Entrepreneurship Competition organized by the Ministry of Science and Technology at the national level, if it coincides with the District's direction of industrial development and settles in the District with proprietary intellectual property rights, its rental payments will be subsidized 100% in the first year, and 50% in the second year, but subject to a ceiling of **RMB 200,000** per enterprise per year.

Technological and Financial Support

A fund of funds (FoF) of RMB 5 billion will be set up for scientific and technological innovation and venture capital investment. Venture capital firm that invests in a technological innovation-driven enterprise at the seed stage or start-up stage in the District is entitled to an incentive at 10% of the amount invested, up to **RMB 1 million** for an enterprise they invest in, and up to **RMB 5 million** for a single venture capital each year.

IV. Accelerating the Headquarters Economy

Economic Contribution Incentive

- An incentive will be given to each company HQ in the construction sector with an annual construction output of over RMB 10 billion and a contribution of more than RMB 30 million to the District's economic development, industrial HQ with annual business revenue above RMB 1 billion and a contribution of more than RMB 30 million to the District's economic development, company HQ in the wholesale trade sector with annual business revenue above RMB 1 billion and a contribution of more than RMB 10 million to the District's economic development, company HQ in the retail sector with annual business revenue above RMB 500 million and a contribution of more than RMB 10 million to the District's economic development, company HQ in the sectors of scientific research and technological services, Internet and related services, software and IT technology services, leasing and commercial services and resident services with annual business revenue above RMB 200 million and a contribution of more than RMB 8 million to the District's economic development, company HQ in the hotel and catering sectors with annual business revenue above RMB 100 million and a contribution of more than RMB 5 million to the District's economic development, on the condition that the said company HQ can achieve a YoY growth rate of over 5%. The incentive shall be calculated at 12% of its stable contribution to the District's economic development, whichever is the highest as compared with the previous two years, and 60% of the incremental portion. The incentive for the stable portion may be up to **RMB 20 million**.

- Each newly incorporated headquarters enterprise is entitled to an incentive equal to **100%** of its contribution to the District's economic development within the year when it achieves increments over statistical months and comply with the previous paragraph during the validity period of these policy measures, and **60%** of its contribution in the second and third years if its business revenue can accomplish a YoY growth rate faster than **10%**.

Enterprise Talent Incentive

Each eligible talent of a headquarters enterprise is entitled to an incentive equal to 15% of his/her taxable income, which may be up to **RMB 3 million** per person per year, but shall not exceed 100% of the taxable amount.

Development Ranking Incentive

Enterprise that makes it to the rankings of Fortune Global 500, China's Top 500 Enterprises, China's Top 500 Private Enterprises, China's Top 500 Enterprises of Manufacturing Industry, China's Top 500 Enterprises of Service Industry or China's Top 500 of Retail Industry is entitled to a one-time incentive of RMB 20 million, 10 million, 5 million, 1 million, 1 million or 500,000, respectively.

Office Rent Subsidy

Eligible headquarters enterprise that leases office rooms for its own use in the District may be subsidized for rental payments in the first three years at RMB 50 per square meter each month, up to **RMB 3 million** annually. Enterprise that purchases office rooms for its own use will be granted a one-time subsidy equal to 10% of the purchase price up to **RMB 5 million**.

V. Converging Modern Service Sectors

Economic Contribution Incentive

- An incentive will be given to each modern service enterprise in the sectors of scientific research and technological services, Internet and related services, software and IT technology service with annual business revenue above RMB 100 million and a YoY growth rate of over 10%, in the leasing and commercial service sector with annual business revenue above RMB 50 million and a YoY growth rate of over 6%, and in the resident services or hotel and catering sectors with annual business revenue above RMB 30 million and a YoY growth rate of over 6%. The incentive will be calculated at 10% of the enterprise's stable contribution to the District's local economic development, whichever is the highest as compared with the previous two years, and 60% of the incremental portion. The incentive for the stable portion may be up to **RMB 20 million**.

LAW

ACCOUNTANT

CONSULT

ADVERTISEMENT

Branch set up by a prestigious enterprise or organization in the legal, accounting, consulting or advertising sector is entitled to an incentive equal to 10% of its contribution to the District's economic development, up to **RMB 2 million**.

- Wholesale enterprise with annual business revenue above RMB 2 billion is entitled to an incentive of RMB 10,000 for every RMB 200 million revenue it generates based on the annual business revenue whichever is the highest as compared to the previous two years, but subject to a ceiling of **RMB 10 million** per enterprise per year. Each time the amount of business revenue increases RMB 100 million, the wholesale enterprise will be given an additional incentive of RMB 80,000, but subject to a ceiling of **RMB 30 million** per enterprise per year.
- Retail enterprise with annual business revenue above RMB 200 million is entitled to an incentive of RMB 10,000 for every RMB 100 million revenue it generates based on the annual business revenue whichever is the highest as compared to the previous two years, but subject to a ceiling of **RMB 10 million** per enterprise per year. Each time the amount of business revenue increases RMB 50 million, the retail enterprise will be given an additional incentive of RMB 50,000, but subject to a ceiling of **RMB 30 million** per enterprise per year.
- Newly incorporated enterprise that achieves increments over statistical months during the validity period of these policy measures is entitled to an incentive equal to **100%** of its contribution to the District's economic development within the year (including enterprise talent incentives) on condition that it is an enterprise in the wholesale, retail, or scientific research and technological service sector with annual business revenue exceeding RMB 300 million, 200 million or 100 million, an enterprise in the Internet and related services, software and IT services, or leasing and commercial services sector with annual business revenue exceeding RMB 50 million, and a resident services or hotel and catering enterprise with annual business revenue exceeding RMB 30 million, and **60%** of its contribution in the second and third years on condition that its business revenue grows faster than 10% YoY.
- Each enterprise growing from below to above design ated size for the first time is entitled to a one-time incentive of **RMB 100,000**.

Enterprise Talent Incentive

Each eligible talent of retail enterprises is entitled to an incentive equal to 15% of his/her taxable income, which may be up to RMB 3 million per person per year, but shall not exceed 100% of the taxable amount.

Only 10 or fewer talents in a single enterprise can receive the incentives, and the total incentive amount should not exceed 30% of the enterprise's contribution to the District's local economic development.

Brand Building Incentive

- To encourage manufacturing enterprises to speed up their development of customized design, network-based collaborative design, cloud design and experience interactive design by purchasing industrial design services, each key industrial design purchase project with a design cost of more than **RMB 300,000** is entitled to an incentive equal to 40% of the design cost incurred after the project contract has been fulfilled, but subject to a ceiling of **RMB 1 million**.

- Enterprise with a product selected as an outstanding industrial software product or an excellent industrial IoT app solution by the Ministry of Industry and Information Technology is entitled to a one-time incentive of RMB 500,000 or 300,000, respectively. New scenarios and business forms of smart retail promote online/offline interaction and the collaboration of commerce, tourism, culture and sports. To encourage the construction of "smart shops", "smart streets" and "smart business districts", each exemplary project recognized by the state, provincial or municipal commerce department is entitled to a one-time incentive of **RMB 1.5 million, 1 million or 500,000**.

Exemplary e-commerce enterprise/park/base recognized (including those added later) by the state, provincial or municipal commerce department is entitled to a one-time incentive of RMB 2 million, 1.5 million or 500,000, respectively.

The operator of a software park recognized as a prestigious software park at the national, provincial or municipal level is entitled to a one-time incentive of RMB 3 million, 2 million or 1 million, respectively.

Project supported by special national, provincial or municipal funds for industrial development is entitled to auxiliary support up to RMB 5 million.

- Expenses incurred by enterprises attending exhibitions hosted or organized by the government or under the guidance by the District may be reimbursed. In case of a special exhibition, if the special installation booth occupies a space of over 100 or 150 square meters, a one-time incentive of **RMB 100,000 or 150,000** will be given, but it shall not exceed the actual exhibition expenses; if the special installation booth occupies a space of less than 100 square meters, 50% of the blank space expenses will be reimbursed. For an exhibition attended, the subsidy received by the enterprise won't exceed incentive up to RMB 100,000. In case of a standard exhibition, an incentive shall be given equal to 50% of the expenses for each standard booth, and each enterprise can be reimbursed up to two standard booths. The incentive received by a single enterprise shall not exceed **RMB 200,000** per year.
- To support R&D services, biomedical R&D service enterprises (incl. CRO&CDMO) will be charged at a VAT rate of **6%** for modern service sectors.

Supply Chain Industrial Park Operation Incentive

The District will select from recognized supply chain industrial parks with annual business revenue of RMB 20 billion, 30 billion or 50 billion and grant the operators a one-time incentive at of **RMB 500,000, 800,000 or 1 million**, respectively.

Quality Project Subsidy

For enterprises in the sectors of scientific research and technological services, internet and related services, software and IT technology services, leasing and commercial services and resident services that settle in the District and achieve increments over statistical months and annual business revenue exceeding RMB 200 million during the validity period of these policy measures, while leasing office rooms for their own use in the District, they can enjoy a subsidy equal to **50%** of their rental payments for three years, but subject to a ceiling of **RMB 1 million** per enterprise per year.

Foreign Trade Incentive

- For enterprises enjoying the provincial or municipal export credit insurance support and taking out the "short-term export credit insurance", 40% of their actually paid insurance premiums may be reimbursed, but subject to a ceiling of **RMB 500,000** per enterprise per year. The total fiscal support should not exceed their actual amount of payments.
- Enterprise generating revenue of over USD 1 million from onshore outsourcing or USD 500,000 from service import & export trade above USD 500,000 is entitled to an incentive in the ratio of RMB 0.01 : USD 1, but subject to a ceiling of RMB 150,000 or 1 million. Enterprise recognized as a service outsourcing talent training agency at the provincial or municipal level is entitled to a one-time incentive up to **RMB 150,000**. Enterprise or organization recognized for the first time by service outsourcing industry authority within the validity period is entitled to a one-time incentive up to **RMB 200,000**.
- To encourage parallel import of vehicles, each importing enterprise (with L/C) is entitled to a subsidy of **RMB 3,000** per vehicle imported.

*The Measures shall come into force on May 19, 2023 and remain effective for 3 years.

* For receipt of policy support, relevant official documents shall prevail.

Ten Measures for Promoting High-quality Development of Biomedical Industry

Focus on Major Projects

Major industrial projects will be given support at **10%-30%** of total fixed asset investment

Up to RMB 500 million for a project

Those who organize employee training will be given a subsidy at **50%** of the actual training costs

Up to RMB 3 million per year for an enterprise

A subsidy of up to **RMB 15 million** will be given to a Fortune Global 500 firm, a Global Top 50 Pharma and Medical Device firm, a recognized leading enterprise or a unicorn in a sub-industry, or a company with outstanding innovation capability that sets up headquarters with independent legal person status or a R&D center, or a newly settled internationally renowned lab

For a major project with over 5,000 m² of newly rented space and over RMB 100 million of new investment, the newly rented area will be given

a subsidy at 50% of the actual rent paid
for 3 years
Up to RMB 10 million per year for an enterprise

Accelerating Innovation Breakthroughs

A new drug or modified new drug that has obtained clinical approval from the National Medical Products Administration in the District and is being industrialized, with over **RMB 10 million** invested in domestic clinical trial R&D costs, will be granted funding of up to 40% of actual clinical R&D costs in stages

Projects that complete stage I, II or III of clinical trials will be given a subsidy as follows (up to)

Stage I	Stage II	Stage III
RMB 10 million	RMB 20 million	RMB 30 million

Up to RMB 100 million per year for an enterprise

For a new drug certificate or registration approval, a reward of up to RMB 10 million will be granted to the enterprise

Driving Model Leadership

-  To accelerate the cultivation and introduction of leading contract research organizations (CROs), for a CRO that rents offices for its own use in the District
  funding will be granted at **40% of the actual rent paid**
Up to **RMB 1 million** per year for an enterprise
-  For a CRO with fixed asset investments of over RMB 500 million and annual revenue of over RMB 200 million
  a one-time subsidy will be given at **20% of the R&D investment during the construction phase, up to RMB 1 million**
-  For a CRO with annual revenue of over RMB 50 million that provides services to non-affiliated biopharmaceutical enterprises or institutions without an investment relationship
  funding will be granted at up to **5% of the actual service amount**
Up to **RMB 10 million** per year for an agency
-  To encourage a leading CDMOs/CMO to actively undertake drug production
  funding at **20% of the actual investment** will be granted
Up to **RMB 15 million** for each drug type
Up to **RMB 30 million** per year for an enterprise

Intensifying Financial Support

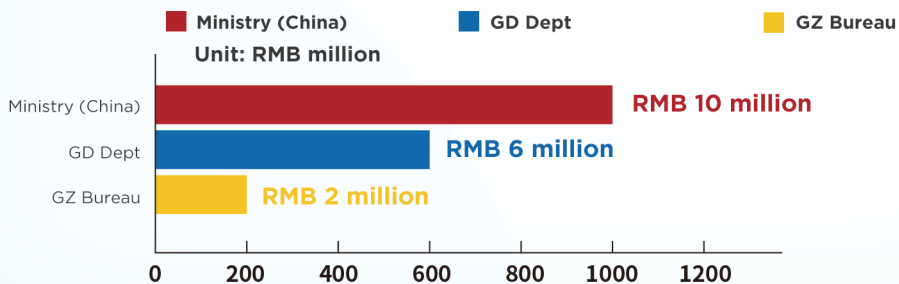

A newly introduced qualified and well-known PE and VC firm for biotech will be given the support of up to **RMB 20 million**

Such a PE and VC firm, if it has invested in a high-tech enterprise in the seed or start-up stage in GDD for over 2 years will be given a subsidy at **10%** of its actual investment
Up to **RMB 5 million** per year for an agency

Fostering Top-notch R&D Capabilities

Enterprises or institutions included in a major innovation platform or system, e.g., Guangzhou Laboratory, and undertaking a major or key special scientific research program funded by the Ministry of Sci & Tech (China), Guangdong Sci & Tech Department, and Guangzhou Municipal Sci & Tech Bureau will be respectively given supporting funds up to

*The Measures shall come into force on May 29, 2021 and remain effective for 3 years.

* For receipt of policy support, relevant official documents shall prevail.

Guangzhou Development District/Huangpu District Several measures to promote the high-quality development of new energy storage industry

Major Project Reward

Major projects playing a leading role in driving the overall development of energy and electronics industries such as new energy storage in the District are encouraged.

A new high-quality project with a fixed asset investment of over **RMB 50 million** will be granted a reward at **10%** of the aggregate fixed asset investment, up to **RMB 100 million**

Quality Project Reward

Rent office space in the area, high-quality enterprises with factories and self-use

If the annual output value of the year reaches more than **RMB 50 million** a subsidy will be given according to **50%** of the actual rent incurred in the year. A single enterprise can receive up to **RMB 500,000** per year, and support can be given for a maximum of three years.

Synergy/Collaboration Demonstration Reward

Support will be given to energy and electronics enterprises and industry-leading enterprises, key construction projects, and manufacturing innovation centers in collaboratively developing diversified applications or customizing applications, thus facilitating the deep integration and innovative application of solar photovoltaics, new energy storage batteries, key terminal applications, key information technologies and products, and building a high-quality development ecosystem featuring industrial synergy and common prosperity.

Within the validity period of the policy, up to **10** demonstration application projects will be identified each year and given a reward of up to **RMB 200,000** per project.

Information Technology Innovation Reward

- Encourage enterprises to carry out the development and application of key information technology products for the new energy field, and promote the industry

Digitizing

Intelligent

development

- Within the validity period of the policy, up to ten products related to **advanced computing, industrial software, intelligent integration, smart operation and maintenance systems**, etc.

Advanced computing

Industrial software

Intelligent integration

Smart operation and maintenance system

will be identified each year and given a reward of up to **RMB 200,000** per product per year.

Encouraging Development of Featured Industrial Parks

Support for new construction or renovation and expansion

Create a new energy storage characteristic industrial park with distinctive industrial characteristics and high industrial concentration.

Within the validity period of the policy, up to 3 new energy storage demonstration parks will be identified each year and given an operational subsidy of up to **RMB 500,000** per park.

New Product Certification Subsidy

New energy storage enterprises are encouraged to go global and expand their share of the overseas energy storage market. New energy storage products manufactured locally or local new applications that have obtained authoritative certifications for market access in countries or regions such as the EU, the U.S., Japan, and South Korea will be given

as per approval, a subsidy at **50%** of the actual costs incurred for gaining such certifications, up to **RMB 1 million** per enterprise per year.

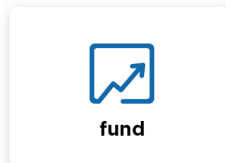

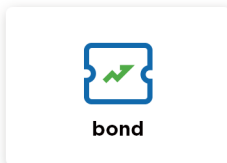

Promotion & Application Reward

Support will be given to the diversification of user-side new energy storage and new applications of integrated energy storage. For a new energy storage station with an installed capacity of one megawatt or more,

its investing entity will, from the following month after the project is connected to the grid, be given a subsidy of up to **RMB 0.2/kWh** based on the discharge capacity, up to **RMB 3 million** for no more than 2 years in a row.

Intensifying Financial Support

Guide financial institutions to comprehensively use

Increase capital investment in the supply chain of the new energy storage industry chain

Matchmaking platforms for financial institutions and new energy storage enterprises will be established, and investment and financing matchmaking events will be held to facilitate the development of the new energy storage industry. Matchmaking platforms for financial institutions and new energy storage enterprises will be established, and investment and financing matchmaking events will be held to facilitate the development of the new energy storage industry.

*These Measures shall come into force as of June 20, 2023 and remain effective for 3 years.

*For receipt of policy support, relevant official documents shall prevail.

Huangpu District / Guangzhou Development District and Guangzhou High-tech Industry Development Zone Measures for Promoting Green and Low-Carbon Development

Support Green and Low-carbon Development

Support circular economy and comprehensive utilization of resources

In line with the Circular Economy Promotion Law of the People's Republic of China, the Catalog of Preferential Income Tax for Enterprises in Comprehensive Utilization of Resources, and the Catalog of Products in Comprehensive Utilization of Resources, for projects related to the circular economy and comprehensive utilization of resources and focusing on "reduction, recycling and resource utilization", the investors will receive a subsidy equivalent to 20% of the total actual investment (the investment amount allocated for fixed assets, excluding taxes, and mainly for civil construction and equipment procurement) of the project. The subsidy for a single project won't exceed RMB 2 million.

Support energy conservation and carbon reduction

For key energy consumers under national, provincial, municipal and district supervision, after they fulfill the "dual energy control" targets set by the energy conservation authorities, if their output value for 2025 does not decline compared with that of 2020 and the annual total comprehensive energy consumption decreases by more than 200 tons of standard coal, or the output value for 2025 increases by more than 25% compared with that of 2020 and the energy consumption per RMB 10,000 of output value decreases by more than 10%, a subsidy of RMB 500/ton of standard coal will be granted according to the amount of energy conservation. The subsidy for a single enterprise won't exceed RMB 10 million.

Support the Building of Green Brands

- According to the principle of non-repetition
For those included in the National Green Manufacturing Demonstration List

Give a one-time subsidy
RMB 1 million

For each product of green design included in the list of national green manufacturing demonstration, the enterprise will be granted a one-time subsidy of **RMB 100,000** up to **RMB 500,000** for a single enterprise.

Enterprises rated as a national Energy Efficiency Forerunner will be given a one-time subsidy of **RMB 300,000**

- According to the Measures for Clean Production Audit, enterprises which implement clean production for the first time, pass the audit, and are rated as an Excellent Clean Production Enterprise will receive a subsidy of **RMB 150,000**. Those rated as a Clean Production Enterprise will receive a subsidy of **RMB 100,000**, while those who pass the clean production audit for simple processes will be eligible for a subsidy of **RMB 25,000**. For enterprises whose certificates for (Excellent) Clean Production Enterprise (including those for simple processes) have expired, if they voluntarily undergo a new round of clean production audit and obtain the title of Excellent Clean Production Enterprise by following the standard processes (full processes), they will be granted a subsidy of **RMB 50,000**. Those awarded the title of Clean Production Enterprise will receive a subsidy of **RMB 25,000**. Enterprises that pass the municipal-level audit and the provincial-level audit simultaneously will not enjoy duplicate subsidies.

- Enterprises that independently commission a qualified third party to conduct carbon emission audit or greenhouse gas audit and obtain a Carbon Emission Verification Report or a Greenhouse Gas Verification Statement/Certificate will be eligible for a one-time subsidy equivalent to 50% of the actual commissioning fee, up to **RMB 50,000**

Enterprises that independently commission a qualified third party to conduct carbon emission reduction assessment and carbon peak assessment, and obtain assessment reports will be granted a one-time subsidy of **RMB 50,000**

- Subsidies will be provided for projects issued on the carbon inclusion system called "Tanhuipu" in Chinese. Projects will be granted subsidies based on the carbon reduction quantity issued at a rate of RMB 10 per ton of carbon dioxide. The subsidy for a single project won't exceed **RMB 100,000**
- Units with the title of provincial water-saving enterprises, water-saving units (excluding public institutions), and water-saving residential communities, with an annual water consumption of less than 10,000 m³, will be eligible for a subsidy of **RMB 10,000**. If the annual water consumption exceeds 10,000 m³, the unit will receive a subsidy of **RMB 20,000**. Water-saving residential communities shall be represented by the property management company.

Support Energy Management

Key energy-consuming units that have exceeded their annual energy conservation targets will be granted a one-time subsidy of **RMB 60,000**

01

Key energy-consuming units under supervision that independently commission a third party to conduct energy audits, and pass the evaluation by the relevant authorities, will be eligible for a one-time subsidy equivalent to 50% of the actual commissioning fee, up to **RMB 50,000**. Mandatory energy audits required by the relevant authorities are excluded.

02

For energy-consuming units that commission a third party to conduct energy management system certification in accordance with GB/T23331 Energy Management System Requirements, they will be eligible for a one-time subsidy equivalent to 50% of the actual commissioning fee not exceeding **RMB 100,000**, on the condition that this is their first time passing the energy management system certification.

03

Support will be provided for energy-consuming units in developing an energy management information system that facilitates decision-making. The system can collect data on electricity, heat, and other energy sources, support data querying and monitoring, reflect energy utilization, and help with proper allocation of energy resources, and energy consumption reduction. Furthermore, the system can be connected with the Guangzhou Energy Management and Decision-Making Support Platform. The District Reform and Development Bureau will commission experts from a third party to assess the energy management information systems in accordance with the Grading Criteria for Energy Management Information Systems in Key Energy-Consuming Units Under Supervision in Guangzhou. For energy management information systems that are rated as Grade A and B, subsidies of **RMB 200,000** and **RMB 100,000** will be granted, respectively.

04

Support Promotion and Application of New and Re

- Project investors of distributed photovoltaic power generation will be subsidized according to the amount of power generated, and the subsidy standards are:

RMB 0.15/kWh

[The application side (roof side) is a non-public institution]

RMB 0.3/kWh

[Application (roof side) for public institutions]

Each project can receive subsidies for a maximum period of **5 years**, and the subsidy period falls within the effective period of these Measures. The project investors can submit their applications after the project is connected to the grid and has been in operation for at **least 6 months**.

-  For the construction of distributed photovoltaic power generation projects using contract energy management mode (roof side)

A one-time subsidy will be given according to the installed capacity of the project, and the subsidy standard is **RMB 0.2 / watt**. The maximum subsidy for a single project is **RMB 2 million**

The users (rooftop owners) can submit their applications after the project is connected to the grid and has been in operation for at **least 6 months**.

- For charging facility construction projects, a one-time construction subsidy will be granted to the project investors based on the rated output power of the charging facilities. The subsidy for a single project won't exceed **RMB 1 million**. The subsidy rates are as follows:

Charging pile project

DC charging piles, AC/DC integrated charging piles, and wireless charging facilities will be subsidized at a rate of **RMB 200/kW**. AC charging piles will be subsidized at a rate of **RMB 60/kW**.

Battery swapping facility projects

will be subsidized at a rate of **RMB 2,000 /kW**

Additional Financial Support

For enterprise investment projects with the support of national, provincial, and municipal development and reform departments, including resource conservation and recycling, environmental pollution control, energy conservation and environmental protection, and comprehensive energy-saving renovation demonstration for non-public enterprises, as well as financial investment projects with the support of higher authorities, such as energy conservation renovation projects by district-level public institutions within the effective period, the project investors will receive financial support equivalent to **100%**, **70%**, and **50%** of the support amounts provided by the national, provincial, and municipal authorities, respectively. The financial support provided shall not exceed **RMB 5 million**, **RMB 3 million**, and **RMB 1 million**, respectively. The total financial support received from higher authorities and the district government by a single project shall not exceed the amount of funds raised by the project

Optimize Environmental Support

- For industry associations that serve the local new energy industry, have more than **50%** of their members registered within the District, and are legally registered and operating in accordance with their regulations, the District Reform and Development Bureau will assess their application based on evaluation indicators (to be formulated separately).

The assessment results are divided into four categories: excellent, good, qualified, and unqualified.

The assessment results are as follows:

Industry associations give

Excellent

RMB 300,000

Good

RMB 200,000

Qualified

RMB 100,000

Activity subsidy

- The enterprises or institutions are encouraged to organize events such as international or national new energy green industry summits, major forums and innovation competitions in the District. Upon verification, a subsidy equivalent to **30%** of the actual expense for the event will be granted, up to **RMB 1 million** for a single event.

*The Measures shall come into force on May 20, 2021 and remain effective for five years.

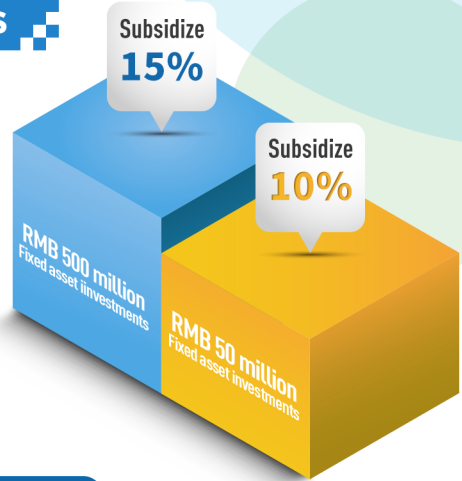

* For receipt of policy support, relevant official documents shall prevail.

Measures for Promoting Development of Hydrogen Industry

Subsidies for Investments

- Projects with a fixed asset investment of over **RMB 50 million** will granted a subsidy at **10%** of the total fixed asset investment.
- Projects involving key components that meet the national requirements for fuel cell vehicle demonstration and have received national demonstration support funds with a fixed asset investment of over **RMB 500 million**, will granted a subsidy at **15%** of the total fixed asset investment

Up to RMB 100 million for an enterprise or institution

Subsidies for Recognized R&D Institutions

For hydrogen R&D institutions or inspection and testing agencies recognized by provincial departments independently or jointly,

will funding
RMB 5 million will be granted

Hydrogen R&D institutions or inspection and testing agencies recognized by national ministries /commissions independently or jointly

funding
RMB 10 million will be granted

Subsidies for Industry Associations

- Subsidies will be granted to a hydrogen industry association registered with a governmental department as follows:

Up to RMB 1 million per year for an association

Subsidies for Industrial Parks

- 01**
 - The operation or management agency of a recognized hydrogen industrial park will be granted a one-time subsidy of **RMB 250,000**. An annual subsidy of up to **RMB 1 million**, at **50%** of the actual operation or management costs, for **up to 3 years**.
- 02**
 - For a hydrogen industrial park that has introduced more than 6 hydrogen enterprises/institutions, each with paid-in registered capital of **over RMB 1 million**, and operating for more than 1 year after entry, the Park's operation or management agency will be granted a subsidy of up to **50%** for every enterprise or institution introduced, up to **RMB 1 million** per year for an industrial park.
- 03**
 - When a hydrogen enterprise or institution that meets the aforesaid criteria settles in a recognized hydrogen energy industrial park or other carriers and has rented office or factory space for its own use, it will be granted an office subsidy at **50%** of its actual office rent and a factory space subsidy of **RMB 10/m²/month**. Up to **RMB 1 million** per year for an enterprise or institution for up to 3 years.

Subsidies for Hydrogen Stations

An integrated oil, hydrogen, gas and electricity station

will be granted a subsidy of RMB 2.5 million

A fixed hydrogen station with independent land occupation

will be granted a subsidy of RMB 2.5 million

A skid-mounted hydrogen station

will be granted a subsidy of RMB 500,000

- In 2021, a hydrogen station with a hydrogen sales price **not higher than RMB 35/kg** will be granted **a subsidy of RMB 20/kg**.
- In 2022 and 2023, a hydrogen station with a hydrogen sales price **not higher than RMB 30/kg** will be granted **a subsidy of RMB 15/kg**.

Additional Supporting Funds

Projects that have received national, provincial and municipal industry development funding will be given additional monetary support at

100%

70%

50%

of the supporting funds they received

Up to

RMB 5 million

RMB 3 million

RMB 1 million

*The Measures shall come into force on June 12, 2021 and remain effective for 3 years.

* For receipt of policy support, relevant official documents shall prevail.

Several Measures to Improve Computing Power and Algorithms, and Contribute to High-quality Development of Digital Economy

Intensifying Leadership of High-end Projects

Facilitate the R&D and commercialization of technological achievements that improve computing power and constitute breakthroughs in core algorithms by a workstation newly established in the District by an academician, which is also his/her only workstation in China

Those who build a major scientific research platform will be granted funding of up to **RMB 100 million**

For projects involving innovation and startup talents in computing power and algorithm

Funding and direct equity investment support of up to **RMB 20 million** will be granted

Supporting Original Tech and Innovations

For enterprise in the District that joins hands with domestic or foreign scientific institutions in tackling the bottlenecks of AI core algorithms, the system of chief technology officers assuming responsibilities will be implemented

As per the Talent Free Port Policy

a subsidy will be given to the project that has tackled relevant bottlenecks at **30%** of total project investment
Up to **RMB 10 million**

A computing power and algorithms enterprise above the designated size that has set up its R&D institution and spent over **RMB 5 million** in R&D in the current year

will be given a subsidy at **10%** of the R&D increase
Up to **RMB 1 million**

Being a Destination of the World's Top-notch Talents

- or an eligible outstanding talent, excellent talent, and elite talent, a house purchase subsidy will be given at **80%** of the actual purchase cost in the District

80% of the house purchase cost in the District	Outstanding Talent	Excellent Talent	Elite Talent
House purchase subsidy	RMB 5 million	RMB 3 million	RMB 2 million

- Outstanding talents, excellent talents, and elite talents will be given a reward at 10% of their annual taxable incomes obtained from corporate entities in the District each year

**Outstanding
Talent**

**Excellent
Talent**

**Elite
Talent**

Rewards will be given at **10%** of the annual taxable income obtained from corporate entities in the District each year
Up to **RMB 5 million**

Empowering Industrial Transformation and Upgrading

An enterprise that has invested a total of over **RMB 200 million** in registered tech transformation or capital increase for production expansion

will be granted a reward at **12%** of the purchase cost of project equipment and facilities
Up to **RMB 30 million** for a project

Building An Industrial Park Brand With Characteristics

Encourage the building of digital economy industrial parks that focus on providing computing power and algorithm services and offer subsidies at **12%** of the actual operation and management costs of the agency
Up to **RMB 2 million** per year for an agency

* The Measures remain effective for the long term

* For receipt of policy support, relevant official documents shall prevail.

Measures for Promoting Intelligent Sensor Industrialization

Tackling Key Technological Issues

An enterprise above the designated size that has set up its R&D institution and spent over RMB 5 million in R&D in the current year will be given a subsidy at **10%** of the R&D increase, up to **RMB 1 million**

An Intelligent sensor enterprise or institution with its annual tech transaction volume of over RMB 50 million, over RMB 100 million and over RMB 1 billion for its technical contract(s) will be given a reward of **RMB 200,000**, **300,000** and **500,000**, respectively

For an enterprise that has purchased intelligent sensor tech achievements from a domestic/foreign university or sci-tech research institution, if the tech transaction involves patent transfer and includes a core tech invention patent that has been commercialized in the District, a subsidy will be granted at **20%** of the actual value of tech transaction in the contract registered with local regulatory authorities Up to **RMB 2 million** for a contract Up to **RMB 10 million** per year for an enterprise

R&D institutions, e.g., National Key Laboratory and National Engineering Research Center, which are individually or jointly recognized by national ministries, will be granted a subsidy of RMB 3 million
An enterprise awarded as a National Enterprise Technology Center will be given a one-time reward of **RMB 3 million**

Fostering New Momentum of High-quality Development

- A 5G-related intelligent sensor enterprise with paid-in capital of over **RMB 10 million** that is newly established or newly relocated to the District will be given a reward at **5%** of the paid-in capital, up to RMB 3 million for an enterprise in total
- A newly established domestic-funded intelligent sensor manufacturing enterprise

Paid-in capital	Over RMB 100 million	Over RMB 1 billion	Over RMB 2 billion
Reward	RMB 3 million	RMB 5 million	RMB 10 million

01

An intelligent sensor manufacturing enterprise with an output value of over RMB 100 million and over 10% YoY growth, will be given a reward based on the highest value of their contributions to the local economy compared to the previous two years: **10%** of base and **60%** of increment will be given a reward of up to **RMB 50 million**

02

An intelligent sensor enterprise with annual revenue of over RMB 10 million and an over 100% YoY growth rate in 5G business revenue will be given a reward at **10%** of the enterprise's R&D investment or its contributions to the local economy, up to **RMB 2 million**

03

An enterprise with a registered tech transformation project that spends RMB 2 million in the purchase of equipment and facilities, whose YoY increase is below 5%, above 5%, above 8%, and above 10% in output value in the year of commissioning, will be given a reward respectively at 5%, 8%, 10% and 12% of the purchase cost, up to **RMB 20 million** per year for an enterprise

04

An intelligent sensor manufacturing enterprise above the designated size that produces and sells products through commissioned processing to expand production will be rewarded at 1% of increment and 1‰ of base of commissioned processing for the current year
Up to **RMB 10 million** for increment Up to **RMB 2 million** for base

Promoting Application demonstration for Characteristic Industries

Projects that have received national, provincial and municipal industrial development support will be given an additional monetary support at

100%

70%

50%

of the supporting funds they received

Up to

RMB 5 million

RMB 3 million

RMB 1 million

An enterprise with its pilot demonstration project of smart manufacturing recognized by national and provincial DIIT will be given **a one-time reward of RMB 2 million and RMB 1 million respectively**

For enterprise with production process facilities and smart equipment products connected to the "cloud platform" **a subsidy of RMB 2,000 will be given for each facility or set of equipment Up to RMB 100,000 per year for an enterprise**

Building a Comprehensive Industrial Support System

Supporting Leading enterprises in intelligent sensor manufacturing, etc., to jointly build a public technical service platform for the digital economy. Providing one-time subsidies at **30%** of the platform construction costs, up to **RMB 5 million**

Encourage the building of digital economy parks featuring intelligent sensors and provide subsidies at **30%** of the actual operation and management costs of the agency, up to **RMB 5 million** per year for an agency

An enterprise going public on domestic and overseas capital markets will be granted a total reward of **RMB 6 million**, which will be granted in stages.

REWARD
RMB 6 million

Enterprise listed on the New Third Board and its corporate at the highest tier will be granted a reward of **RMB 1 million** and **500,000** respectively

REWARD
RMB 1 million

REWARD
RMB 500,000

Organizer of a high-standard, high-level industry summit, major forum, innovation competition, academic exchange, etc., will be granted a subsidy at **30%** of the actual costs incurred
Up to **RMB 1 million** for an event hosted

SUBSIDY OF UP TO
RMB 1 million

* The Measures remain effective for the long term

* For receipt of policy support, relevant official documents shall prevail.
